Dr. Keating currently serves as President, Lucerne International [www.lucerneinc.com], a geospatial consulting company formed in 1995. Terry provides outside technical and managerial consultation to various companies in the areas of strategic planning, marketing, product/process improvement, technical assessments, project management – (mapping, GIS, IT), mergers and acquisitions, management of acquired/start-up companies and as an expert witness (survey, photogrammetry, imaging). Recent managed or quality assured statewide mapping and parcel/E911 addressing programs included engagements in NJ, NY, VA, TX, PR, and currently WV.

Terry recently completed (Dec. 2005) a three year contract with Intergraph Corporation, <www.Intergraph.com> where he served as Executive Planning Director for their \$450M Security, Government & Infrastructure Division. In 2002-4, he served as the Chairman of Z/I Imaging, a \$30M photogrammetric hardware and software company, acquired in 2002 and merged with Intergraph.

Terry has founded and operated several companies involved with photogrammetry, mapping and GIS software and services, including Kork Systems (software), Lucerne International (technical and management consulting) and Digital Mapping Associates (mapping).

He serves as an advisor to many domestic and international federal and state agencies and private mapping corporations. Recent appointments to Federal mapping-related committees include the National Research Council's Mapping Sciences Committee, NOAA's Land Remote Sensing Policy Committee and an USGS NDOP study.

Professional organization positions include past director of the Management Association for Private Photogrammetric Surveyors (MAPPS), past president of the Maine Society of Land Surveyors (MSLS) and in 2002-3 Terry served as the national president of the American Society of Photogrammetry and Remote Sensing (ASPRS).

Professional registrations include Certified Photogrammetrist, Registered Land Surveyor (ME) and Professional Engineer (WI).
